

Results

1) Text Classification with CNN

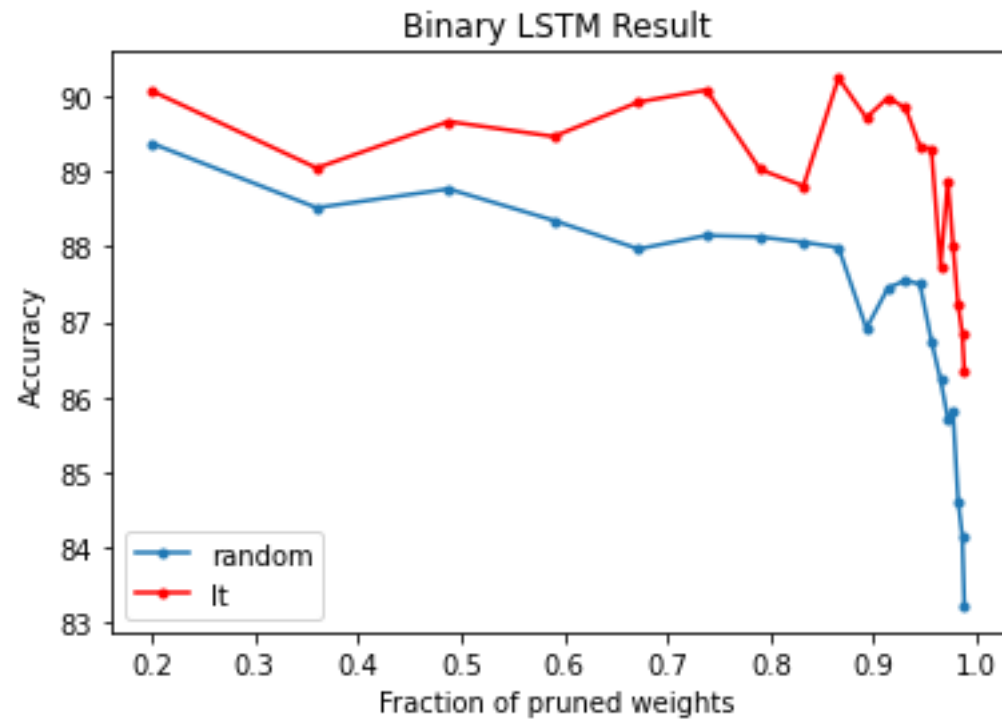

5,120,801 trainable parameters
(120K Convs & 5M Embedding)

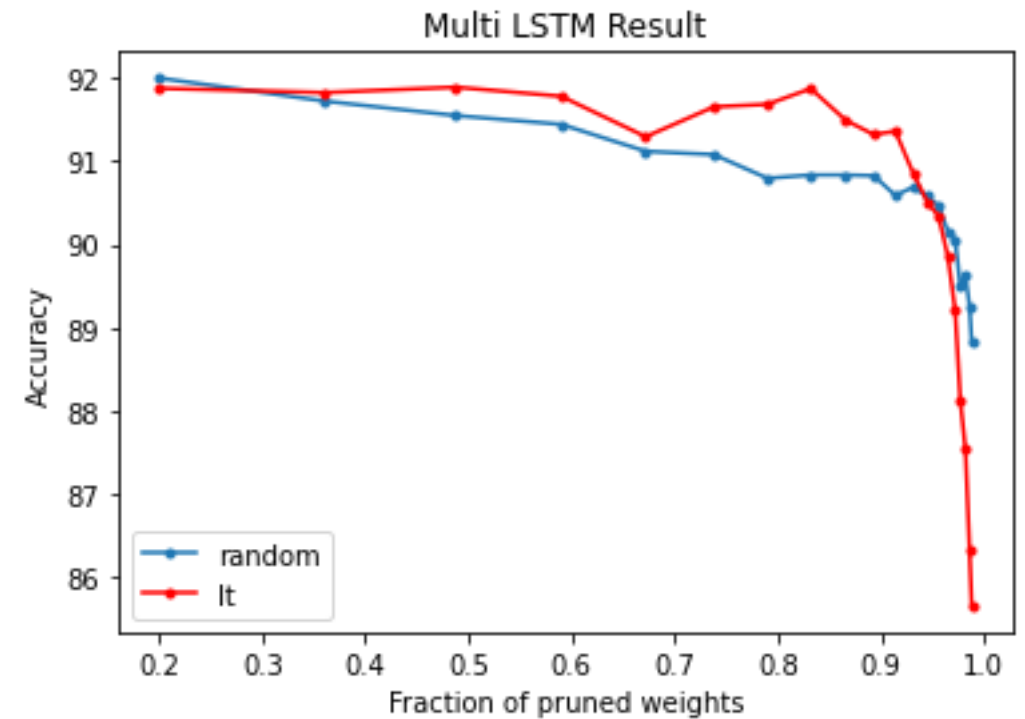

5,121,704 trainable parameters
(120K Convs & 5M Embedding)

Results

2) Text Classification with LSTM

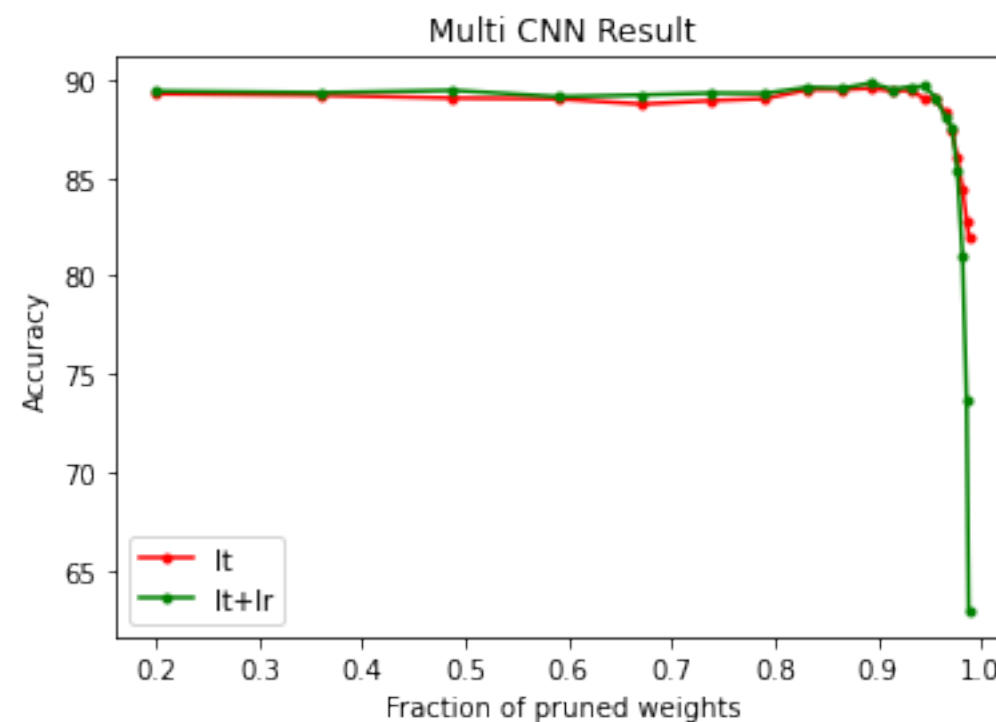

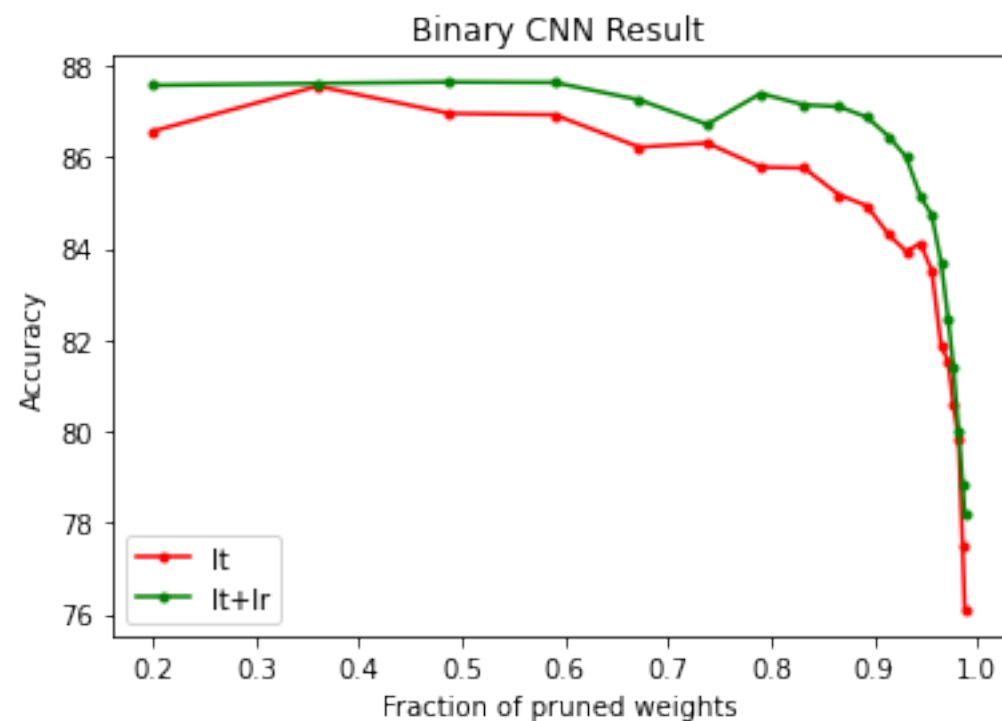

4,810,857 trainable parameters
(1.3M RNNs & 2.5M Embedding)

4,812,396 trainable parameters
(1.3M RNNs & 2.5M Embedding)

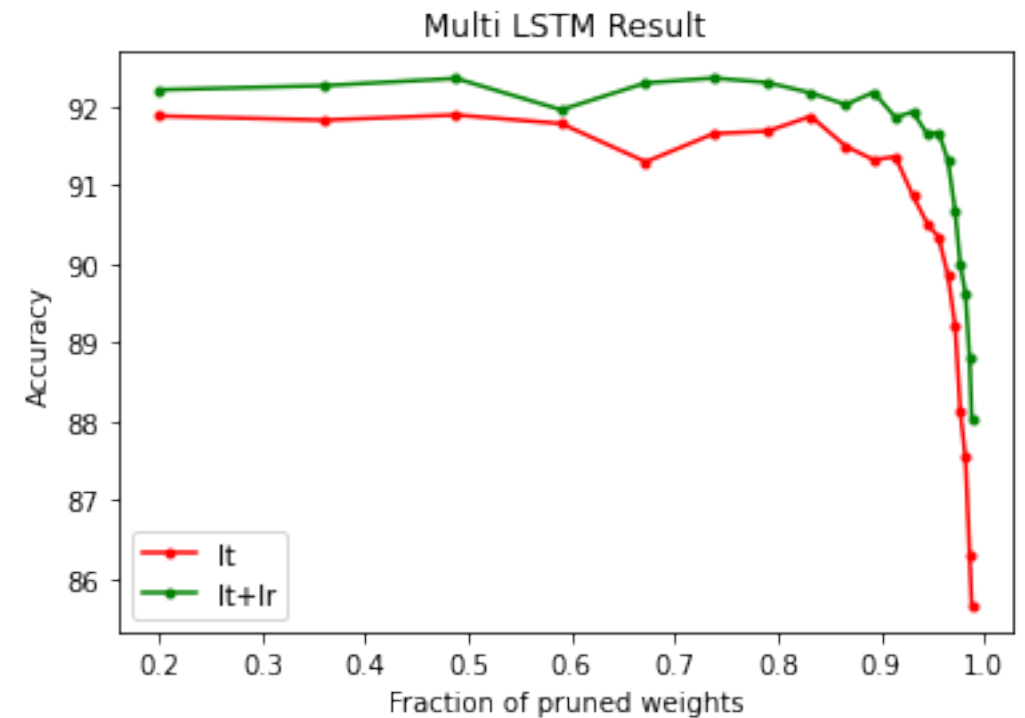

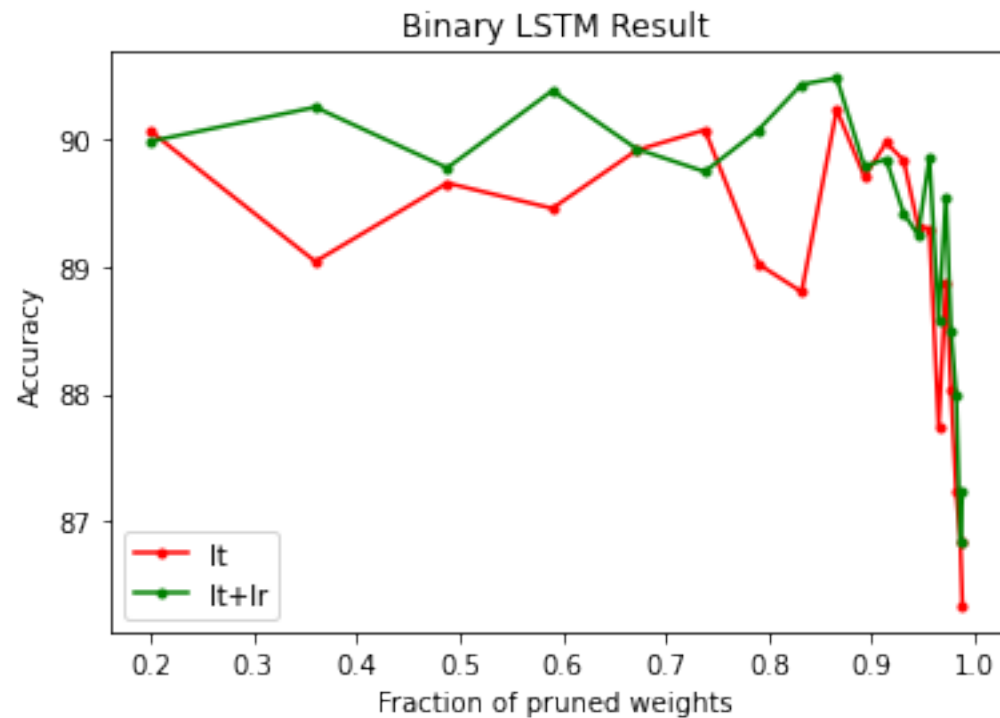

Results

3) Can 'Late Rewinding' improve the performance?

Results

3) Can 'Late Rewinding' improve the performance?

Results

| | It | | | It + Ir | | |
|----------------|------------------------|----------------------------|----------|------------------------|----------------------------|----------|
| | Full model performance | Winning ticket performance | Sparsity | Full model performance | Winning ticket performance | Sparsity |
| IMDb + CNN | 87.04 | 87.55 | 36% | 87.04 | 87.64 | 48.8% |
| AG-news + CNN | 89.18 | 89.56 | 89.3% | 89.88 | 89.82 | 89.3% |
| IMDb + LSTM | 90.60 | 90.24 | 86.6% | 89.96 | 90.49 | 86.6% |
| AG-news + LSTM | 91.75 | 91.89 | 48.8% | 91.55 | 92.36 | 73.8% |
